### Bottom Fixing Strip

## Important Note :

Due to the nature of the light omitting seal created by this blackout blind, windows must be closed while this blind is down. Opening a window behind the blind could cause a vacuum resulting in the fabric being sucked from the side channels and resulting in damage to the blind.

Any damage caused by operating our Cassette Blinds with a window open or in an environment with a high air flow will void the warranty.

These blinds are designed to be used with windows fully closed.

We expect our cassette blinds to provide darkness in your room for standard use. However, we cannot guarantee absolute darkness due to differences in installation, location and light direction. Every care and attention has been made to engineer this type of blind to give maximum levels of darkness.
